MUSIC INSIDE

Voggenreiter

Tradition in music since

1919

Voggenreiter: meaning music for more than a century!

It all started in 1919 with a few Boy Scout songbooks. These days, more than 100 years later, Voggenreiter publishers is a modern family business, publishing a whole range of educational material for musicians of all levels.
Many trend-setting Voggenreiter books have been considered standards of musical education for a long time. But there's a lot more to Voggenreiter than just books: sound toys for toddlers and instruments for beginners as well as advanced musicians complete our range of products.

It doesn't matter to us if it's a traditional method or custom-developed learning software: the pure joy of making music always is our top priority.
But making music can only be fun if the equipment complies to high quality standards.
That's why all our products are constantly re-designed and optimized.
You can see this and you can hear it, too.

Our sound toys, instruments and music equipment all have these features in common:
- **inspiring sound**
- **high product safety**
- **best ergonomy, ease of use and modern design**

Music makes you smart, music is fun, music makes you happy–and our method books and instruments can be just the ticket to the wonderful world of rhythm and melody.

Hoping to see you soon!

Ralph & Charles Voggenreiter and the Voggenreiter team

VOLT CLASSICAL GUITAR KG-6000 BLACK

NEW!

SEVILLA Classical Guitar – 48 mm „Small Neck“ with Soundport
This classical guitar is the ideal choice for beginners, returning players, and students.
Sustainability is a priority during manufacturing: all woods used are carefully dried and responsibly sourced.
Its solid cedar top, combined with mahogany back and sides, delivers a powerful, well-projected tone with warm mid-tones–and looks stunning, too.
A standout feature of all SEVILLA classical guitars is the adjustable truss rod. It ensures added stability and allows for precise adjustment of the neck relief, making it easy to tailor the string action to your personal playing style.
The elegant matte black finish suits this guitar perfectly.
Paired with the wood-toned binding, it creates a harmonious contrast that makes the instrument a real beauty.
The soundport–a discreet opening in the upper bout–enhances the playing experience, allowing the player to hear the sound more directly, openly, and intensely.
Thanks to the narrower 48 mm nut width („Small Neck“), the guitar feels exceptionally comfortable to play–ideal for those with smaller hands or players switching from steel-string acoustic or electric guitars. Its clean, full, and balanced sound is impressive in every respect.

Specifications:
Top: Solid cedar
Back and sides: Mahogany
Neck: Mahogany
Fretboard and bridge: Rosewood
Tuners: Open-gear, gold-colored with simple mother-of-pearl buttons
Frets: Nickel-silver, with side fret markers
Finish: Open-pore, matte black
Special features: Soundport and slim neck
Strings: D'Addario XT, coated
Soundport

SEVILLA KG-4000 LADY

High-gloss finish, elegance, and exceptional sound

The SEVILLA KG-4000 LADY classical guitar is not only an eye-catcher in its radiant, high-gloss pink finish, but also a masterpiece in terms of sound and comfort. This guitar was specifically designed for players who value ease of play and a unique tone. With a nut width of 48 mm, it is particularly well-suited for smaller hands, making it comfortable to fret notes and play chords–an ideal instrument for both beginners and more advanced players.

Product Details:
- Color: High-gloss pink finish
- Top: Solid spruce
- Back & Sides: Mahogany
- Neck: Okoume
- Fretboard & Bridge: Rosewood
- Nut width: 48 mm (ideal for smaller hands)
- Soundhole decoration: Large mother-of-pearl inlay
- Strings: Savarez 500CJ
- Includes: 10 mm padded gig bag with backpack-style straps
- Body trim: White accents for an elegant design

The SEVILLA KG-4000 LADY classical guitar is more than just an excellent musical instrument–it's a statement piece. With its striking design, ease of playability, and warm, clear sound, it is the perfect choice for anyone seeking a high-quality, stylish musical companion.

Sevilla Classical Guitars

The SEVILLA KG-5000 and KG-6000 classical guitars were developed specifically for students, offering an ideal entry point with a full-fledged instrument that provides years of playing enjoyment. Available in ½, ¾, 7/8, and 4/4 sizes, they are suitable for players of all ages. The 4/4 models come in two neck configurations: a "small neck" version with a 48 mm nut width–highly popular among players with smaller hands or those transitioning from electric guitar–and a version with the traditional 52 mm nut width. All new SEVILLA classical guitars feature an adjustable truss rod, which enhances stability and allows for precise adjustment of the neck curvature, making it easy to set a comfortable string action. Furthermore, select models include a "sound port"–an opening on the upper side (bout)–which allows the player to experience the sound more directly and intensely. Only carefully seasoned woods are used in their construction: solid spruce for the top, and walnut for the back and sides.
The solid tops ensure an excellent tone and a highly comfortable playing experience. The construction, featuring a traditional Spanish heel, contributes to a well-balanced sound that impresses in every respect. These instruments are also visually striking. Each guitar comes factory-equipped with high-quality, coated D'Addario XT strings and includes a durable, padded gig bag.
In this price range, SEVILLA classical guitars are virtually unrivaled.

Introducing the flagship of the Sevilla classical guitar line: the KG-6000 CTW-EQ.

This 4/4-size model features a cutaway and a Fishman pickup system with an onboard preamp and built-in tuner.
Like all Sevilla classical guitars, it utilizes a Spanish heel construction, where the body and neck are built as a single, integrated unit–the optimal design for superior tone in a classical guitar.
Every new Sevilla classical guitar is equipped with an adjustable truss rod, providing added stability and allowing for precise customization of the neck relief, which also makes it easy to adjust the string action to your preference.
All the woods used in this instrument have been carefully seasoned. The KG-6000 CTW-EQ features a solid cedar top, delivering a full, warm sound, while the cutaway ensures excellent playability, even above the 12th fret.
The Fishman Clásica onboard preamp is specifically designed for nylon-string guitars and includes a Sonicore Classic pickup positioned beneath the saddle. With an easy-to-read LED tuner, controls for volume, bass, middle, and treble, as well as a phase switch, it offers an exceptional balance of usability and sound quality.
With its solid cedar top, the Sevilla KG-6000 impresses with its outstanding tone and effortless playability–and it is a true feast for the eyes.
In this price range, it is virtually unrivaled.

KG-6000 CTW-EQ (4/4)

STEEL STRING ACOUSTIC GUITAR LAKOTA DWG-5000 (SPRUCE)

Good playability and professional sound at a fair price!

Due to its solid spruce top our DWG-5000 sounds just like you'd expect from a good steel string acoustic: strong but well-balanced. Whether your're boldly strumming or fingerpicking delicately, this guitar's open pore finish gives the solid spruce top room to „breathe" and vibrate freely, ensuring good projection and an even frequency response. A good action and a nut width of 43 mm give you optimum playability, fretboard markers help you find your way around the neck and a beautiful pickguard protects the top of your guitar when playing with a pick. Closed chromed machine heads ensure excellent tuning stability, while fretboard markers help you find your way around the neck easy and fast.

You want to play onstage? No problem with the DWG-5000 CTW-EQ's integrated active pickup system and tuner by Fishman (Presys 101). Use volume, bass, mid, treble, brilliance, notch and phase controls to adapt your guitar even to challenging surroundings while quickly tuning on stage with the integrated tuner.

All Lakota guitars are factory-equipped with coated D'Addario XSAPB Light strings, giving you sonority and brillance for months. In dieser Preisklasse ist dies ungewöhnlich und ein deutlicher Pluspunkt.
Sustainable European production and the resulting short delivery distances are further steps to sustainability, perfectly corresponding to Voggenreiter's business philosophy.

Info-Video
Kazoojon

VOLT KAZOOJON® (CUBE)

Small box, big sound

Three different instruments are hiding inside this unique invention: a Mini Cajon, a Kazoo and a Bongo. Playing the KazooJon with your fingers, you can easily create Cajon sounds on the front and Bongo sounds on the back playing surface – or even sing into one of the soundholes for a Saxophon-like sound, thus changing the KazooJon from a rhythm to a melody instrument.
From infant to grown-up, from elementary school to college, whether working, traveling or on vacation, outdoors or at the next music festival: This fascinating little instrument will rapidly become the center of every musical activity!

Features:
- 3-in-1 instrument: Mini Cajon, Kazoo & Bongo
- Modularly useable (double soundhole principle)
- Patented playing surface with integrated damping element
- 2 different playing surfaces (front: Snare/Bass, back: Bongo)

Diameter (approx.): 12 cm
EAN: 42-502583-1168-7
