Sets for toddlers, kindergarden and school

These new sets have been compiled by music educators and music teachers according to modern requirements in early music education and music lessons. Among other things, they contain new and innovative percussion instruments that will captivate your students in no time thanks to their ease of use.

Most of our customers requested sets for a defined group of 10 children. For larger or smaller groups simply change the number of pieces according to your wishes. We are flexible and will gladly implement your wishes. The price of the sets will increase by the respective individual price(s), in case of quantity reductions the price will be reduced by the respective price(s).

Especially the school sets are ideally suitable for making music with groups of seniors and groups of people with disabilities. In addition to music lessons and early musical education these sets are the perfect choice for performances of plays, summer parties, birthday and Christmas parties or the occasional cheerful carnival party.
