

MUSIC INSIDE

Voggenreiter: meaning music for more than a century!

It all started in 1919 with a few Boy Scout songbooks. These days, more than 100 years later, Voggenreiter publishers is a modern family business, publishing a whole range of educational material for musicians of all levels.

Many trend-setting Voggenreiter books have been considered standards of musical education for a long time. But there's a lot more to Voggenreiter than just books: sound toys for toddlers and instruments for beginners as well as advanced musicians complete our range of products.

It doesn't matter to us if it's a traditional method or custom-developed learning software: the pure joy of making music always is our top priority.

But making music can only be fun if the equipment complies to high quality standards.

That's why all our products are constantly re-designed and optimized.

You can see this and you can hear it, too.

Our sound toys, instruments and music equipment all have these features in common:

- **inspiring sound**
- **high product safety**
- **best ergonomY, ease of use and modern design**

Music makes you smart, music is fun, music makes you happy—and our method books and instruments can be just the ticket to the wonderful world of rhythm and melody.

Hoping to see you soon!

Ralph & Charles Voggenreiter and the Voggenreiter team

TUNER

VOLT CLIP-TUNER RCT-5000

There's a very special property to this Clip Tuner: its integrated battery is **USB-chargeable**—goodbye battery changes forever! Just connect the charging cable to a suitable outlet and refuel fresh electricity for up to 10 hours of uninhibited tuning!

Just clamp this small handy clip tuner to your instrument's headstock and perfectly tune your guitar, bass or ukulele, regardless of noisy surroundings. The integrated contact mic reacts to the instruments vibrations, not to background noise. LCD display for easy tuning even under poor lighting conditions (e.g. on stage). Integrated battery protection circuit (tuner deactivation after approx. 5 min of non-use) for longer battery life.

Modes: Chromatic, Guitar, Bass, Ukulele, Baritone, Violin

Sevilla

Classical Guitars

Our KG-5000 range of guitars is completely European-manufactured. Flawless workmanship and good playability are ensured by the combined experience of three generations of luthiers. All woods are gently dried with a particular focus on sustainability during all production processes.

Massive spruce or cedar tops combined with walnut backs and sides result in a clear and full tone with good projection—and these guitars are pure eye candy, too!

These instruments are the ideal students' guitars and available in all common sizes (1/2, 3/4, 7/8 and 4/4) – there's the perfect instrument for every age here!

Please allow us to introduce the flagship of our Sevilla line of classical guitars, the KG-6000 CTW-EQ model.

This 4/4-sized instrument has it all: A cutaway, Fishman active pickup system and integrated electronic tuner. Like all Sevilla models, this instrument is completely manufactured in Europe by experienced luthiers, especially committing themselves to sustained yield.

All Sevilla guitars are made the traditional Spanish way, meaning body and neck of the instrument are built as a unit, optimizing sound production and tone. This construction method is considered the best by most luthiers. All woods used are carefully dried. And while the KG-6000's solid cedar top guarantees a full and warm sound the attractive high-gloss finish makes this guitar a look to behold—with the cutaway giving you optimum access to the fretboard even above the 12th fret.

The Fishmann Clásica onboard preamp has been developed especially for nylon string guitars, using a Sonocore Classic pickup located directly under the bridge inlay. The integrated guitar tuner features an LED display plus volume, bass, middle and treble controls, giving you perfect sound control and usability. Excellent sound and easy playability make our Sevilla KG-6000 the discerning musician's top choice, providing you with a guitar that's a feast on the eye and unrivaled in its price range.

STEEL STRING ACOUSTIC GUITAR LAKOTA DWG-5000 (SPRUCE)

Good playability and professional sound at a fair price!

Due to its solid spruce top our DWG-5000 sounds just like you'd expect from a good steel string acoustic: strong but well-balanced. Whether you're boldly strumming or fingerpicking delicately, this guitar's open pore finish gives the solid spruce top room to „breathe“ and vibrate freely, ensuring good projection and an even frequency response. A good action and a nut width of 43 mm give you optimum playability, fretboard markers help you find your way around the neck and a beautiful pickguard protects the top of your guitar when playing with a pick. Closed chromed machine heads ensure excellent tuning stability, while fretboard markers help you find your way around the neck easy and fast.

You want to play onstage? No problem with the DWG-5000 CTW-EQ's integrated active pickup system and tuner by Fishman (Presys 101). Use volume, bass, mid, treble, brilliance, notch and phase controls to adapt your guitar even to challenging surroundings while quickly tuning on stage with the integrated tuner.

All Lakota guitars are factory-equipped with coated D'Addario XSAPB Light strings, giving you sonority and brilliance for months. In dieser Preisklasse ist dies ungewöhnlich und ein deutlicher Pluspunkt.

Sustainable European production and the resulting short delivery distances are further steps to sustainability, perfectly corresponding to Voggenreiter's business philosophy.

Small box, big sound

Three different instruments are hiding inside this unique invention: a Mini Cajon, a Kazoo and a Bongo. Playing the KazooJon with your fingers, you can easily create Cajon sounds on the front and Bongo sounds on the back playing surface – or even sing into one of the soundholes for a Saxophon-like sound, thus changing the KazooJon from a rhythm to a melody instrument.

From infant to grown-up, from elementary school to college, whether working, traveling or on vacation, outdoors or at the next music festival: This fascinating little instrument will rapidly become the center of every musical activity!

Features:

- 3-in-1 instrument: Mini Cajon, Kazoo & Bongo
- Modularly useable (double soundhole principle)
- Patented playing surface with integrated damping element
- 2 different playing surfaces (front: Snare/Bass, back: Bongo)

Diameter (approx.): 12 cm

EAN: 42-502583-1168-7

Mini-Cajon

Bongo

SAMBA WHISTLE

- two-color Samba whistle (plastic) with collar
- 3 different notes, easy to play
- ideally suited for a percussion combo, carnival, sports (e.g. soccer) or as a signal whistle (boat)

Simply blow into the mouthpiece, closing and opening the sound holes on the sides to accompany simple melodies. Can be used as a signal whistle, too.

Size: approx. 6 x 6 cm, color changes reserved

Color cartouge.
